DETAILED ACTION

Allowable Subject Matter

Claims 11-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record all failed to show either alone and/or in combination the apparatus and method employing the instant apparatus as claimed.

The closest analogous prior art teaching to the instant invention (specifically independent claim-11) and method (claim-17) is to Desgardin (FR 2852578A1), which teaches a base element (a shape sustaining floral support member) and a sheet placed under the base element and a fastener for securing the sheet about the base element as claimed; the '578 reference also teaches a movable support base as claimed and a means for activating that shifts the support base along the vertical axis.

The prior art of record fails to teach or suggest; several movable pivoting draping fingers associated with a tightening cord for guiding the sheet around the base element, and a means for guiding of predetermined shape connected to the support base for guiding all the draping fingers, and a means for activating that shifts the support base and the guide means along the vertical axis, making the draping fingers pivot as they are guided by the guide means, so that they tighten a tightening cord around the draped sheet, as claimed.

The method recited in claim-17 is allowable for the structure recited with the moving of the support base downwardly as claimed (guide means of predetermined shape connected to the support base), and for the structure (multiple movable pivoting draping fingers associated with a tightening cord) recited in the guiding step.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
